

DrivE-Tech 040

In early 2014 the DrivE-Tech 040 was redesigned to the same layout and functionality as the newer DrivE-Tech models 150 and 022 and the other models.

Below is a quick visual guide to the change to assist in field identification.

New version DrivE-Tech 040. Model 5890 404151

NEW

The new DrivE-Tech 040 does not require the additional isolation panel either.

Old version DrivE-Tech 040. Model 5890 404150

The old 040 units have ceased production and are in short supply and only available for failure replacements. These older units are not sold or fitted to new booster or pump sets.

It may be, that a new model 040 is supplied for any failure replacement
