

Your new 8" solution

Some pumping applications require more – and Franklin's Hi-Temp Motor line delivers just that – more. The Hi-Temp motor was designed and built in response to many requests for a motor that can operate dependably in wells with high temperatures and/or low flow conditions.

8" Hi-Temp 75C Submersible Motors for demanding applications

30 through 110 Kilowatt, 3-phase

APPLICATIONS

The Hi-Temp 75C 8" motor utilizes a new, premium encapsulation process and new water soluble coolant to allow continuous operation in water temperatures of up to 75°C (provided minimum allowable rates of flow past the motor are maintained). In addition, this design is capable of handling thrust loads 25% higher than a standard motor without using oil.

Franklin's Hi-Temp 75C is the right choice for your demanding, high temperature well applications.
